

Engineering office for technical product development in the fields of
robotics, sensor technology and medical technology

we can

We implement your idea.
This is where we are strongest:

ROBOTICS

- drive technology
- sensor technology for control
- power electronics

MEDICAL TECHNOLOGY

- development of medical devices
- Safety and EMC according to 60601-1
- approval

SENSOR TECHNOLOGY

- customer-specific adaptations
- in-house sensor development
- interface electronics

our specifics

What we offer and why we are better:

KNOW-HOW AND TOOLS

- electronics development
- mechanical construction
- verification and testing

FROM IDEA TO SERIAL PRODUCTION

- feasibility studies
- prototype development
- industrialisation

COMPETITIVE PRODUCT

- high quality demands
- cost optimisation
- time to market
